

Why GoNo?

Online

With the GoNo™ App, patients are empowered to make informed food, beverage, and supplement decisions all while having access to an expansive online clinical knowledgebase.

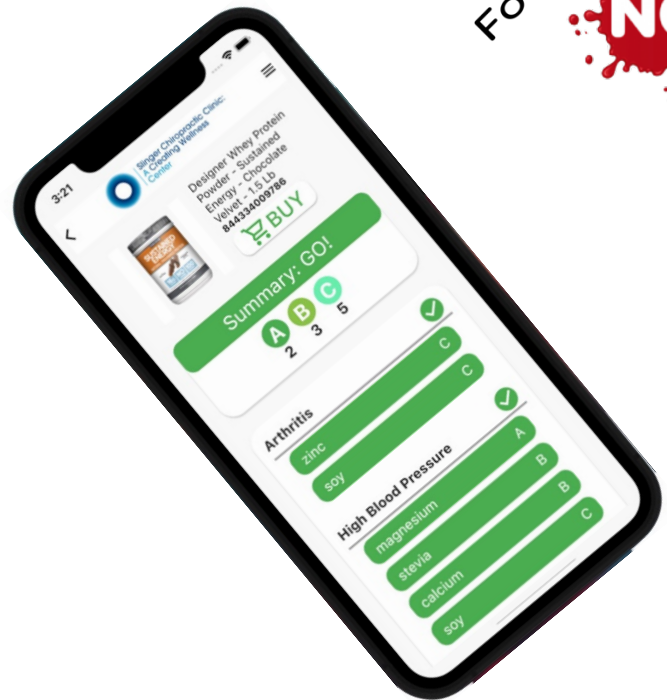

Personalized

We provide personalized recommendations for food, beverages, and supplements proven to benefit selected medical conditions and wellness goals.

Clinically Backed

Efficacy: the probable 'effectiveness' of an ingredient, micro-nutrient, product, or procedure -- aka its ability to produce the results you want backed by clinical results. Our patented Efficacy Engine® evaluates ingredients within a product and delivers a report card and score based on how effective they are for you.

Patient Wellness,
Patient Retention,
and Revenue
for Your Practice

Bad news: 80% of chronic disease is caused by bad food. Great news: 80% of chronic disease can be prevented or treated with the right foods. Unbiased, independent clinical studies by leading physicians, pharmacologists and scientists are behind every recommendation.
